

UDI Excel Cloud Validator

Validate UDI Excel files for EUDAMED & FDA GUDID before submission — 100% browser-based, no SAP system required.

What it is

A lightweight web app on SAP Business Technology Platform (BTP). Teams download a ready-to-use Excel template, upload their UDI data and get instant row-level feedback (errors & warnings). A detailed validation report can be exported as Excel. Authentication is handled by XSUAA; data is processed temporarily in the EU region and is not retained by default.

Who it's for

- MedTech manufacturers & importers
- RA/QA teams preparing EUDAMED/FDA submissions
- Suppliers validating files before hand-off

Business value

- Up to 70% faster preparation via immediate, row-level validation feedback
- Higher first-time-right quality with fewer rework cycles pre-submission
- Zero setup: download template, upload file, export report

Key capabilities

- Built-in templates: EUDAMED (MDR/IVDR Annex VI) & FDA GUDID data elements
- Row-level errors/warnings with concise fix hints
- Excel validation report for review & collaboration
- Authority selection (EU / US) right on the landing page
- Role-based access via SAP XSUAA; multi-tenant deployment
- Works with Microsoft Excel (.xlsx); template download directly in the app

How it works

1. Sign in via browser
2. Pick EUDAMED or FDA and (optionally) download the blank template
3. Upload your completed Excel file
4. Click Validate to see row-level messages
5. Export the report (Excel/CSV) and fix issues until clean

Available editions (SAP Store)

- EUDAMED Validator (EU MDR/IVDR)
- FDA GUDID Validator (US)
- Combo: EUDAMED + FDA
